

OCEATEC

Seafood Processing Equipment Designers

SOLUTIONS FOR THE SEAFOOD AND FISH PROCESSING INDUSTRY

At Oceatec, our expertise and experience in automation solution development and process improvement techniques in the seafood and fish processing industry are second to none. Oceatec specializes in developing new equipment as well as in improving the performance of existing machinery which allows us to solve specific problems that processors and fishermen experience on a routine basis.

Oceatec can effectively solve issues of:

- Process automation of seafood transformation;
- Processing equipment design and fabrication;
- Automation of manual process and operations.
